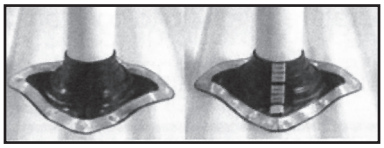
PIPE FLASHINGS FOR METAL ROOFING

SMP COMBO PIPE FLASHINGS. New combination design that can be used in the same applications as our standard SMP pipe flashings for metal roofing with one twist. The SMP combo pipe flashings can be cut, wrapped around the penetration and sealed up like a retrofit flashing. The SMP combo pipe flashings save time and money, and allow you to reduce the amount of parts you stock for metal roofing pipe applications. Manufactured in E.P.D.M. rubber construction with a 20 year warranty. Stainless steel metal clamps are available for purchase for resealing in retrofit applications. Temperature range up to constant 212° Fahrenheit. High temp also available.



Size	Fits Pipes	Base	Qty./Box

High Quality Sealants & Caulking

SEALANTS

7108 PERMATHANE™ PREMIUM POLYURETHANE SEALANT

Permathane® SM7108 is a one component, gun-grade, non-sag, moisture-cure polyurethane sealant. This High Performance product is designed with outstanding UV resistance and long term durability with a proven record in tough climates around the world. Permathane is the choice of true professional installers. 7108 Permathane is an excellent repair sealant due to its moisture cure properties. Permathane can be installed underwater or damp areas and achieve 95% of its full bonding capability. Ideal for mill finish and painted metal roofing panels, window installation, gutter installation and repair and much more. Premium antifungal agents and bonding capabilities.

- Accommodates 50% joint movement
- Easy to gun - Easy to tool
- Permanently flexible
- Paintable - non-sticky after cure
- VOC compliant
- Extra strong bonding, that borders on adhesive sealant properties
- Primerless adhesion to construction substrates, including galvanized steel, aluminum, concrete, glass, Galvalume®, Zincalume®, Kynar 500®, wood, vinyl, and fiberglass

Typical Uses:

- Expansion Wall Joints
- Masonry Expansion Joints
- Air Conditioning Mounts
- Sealing around Roof and Wall Penetrations
- Tilt-Wall Joints
- Flashings
- Metal Roofing
- Perimeter Joints around Windows and Doors
- Gutter Installation and Repair
- Sealing Damp Areas
- Bedding Window Mounting Flanges

Standard packaging is 30 (300ml) tubes/cartridges per carton. Available colors include: Almond, Bronze, Gray and White.
20 oz sausages, 5 gallon pails, and 50 gallon drum packaging available (minimums and lead time applies)

ACRYLIC BUTYL CAULK, ACRYL-R™ 5430 NON SKINNING/NON SAG SSR SEALANT

SM5430 Acryl-R® is a non-skinning, non-drying sealant based on a unique elastomer that provides a non-stringy consistency and excellent resistance to severe environmental conditions of heat, cold and moisture. (DO NOT EXPOSE TO SUNLIGHT) It has excellent cut-off characteristics and is not stringy or messy to apply. It has excellent adhesion to GALVALUME®, GALVALUME PLUS®, ACRYLUME®, ZINCALUME®, KYNAR 500®, siliconized and polyvinyl fluoride painted metals. It has excellent webbing characteristics.

Typical Uses:

SM5430 is designed for factory sealing the female lip of a concealed standing seam roof (SSR) rib, as well as wall panels and polyurethane foam panel joints where a positive seal is required in mechanically fixed joints. Specifically formulated for precise application into concealed panel joints for roll forming lines. Excellent for factory sealing standing seam roof panels and end laps. Excellent for sealing between dissimilar metals to prevent electrolysis. Excellent for use as an acoustical sealant. Excellent surface wetting over a wide temperature ranges. Excellent for sealing hidden details in window and door installations; bedding of mounting fins and flashing and sealing end dams and receptor pans.
Standard packaging is 30 (300ml) tubes/cartridges per carton. Color: White
Also available in 50 gallon drum with polyliner. (drums/pallet) (minimums and lead times apply) Color: White.

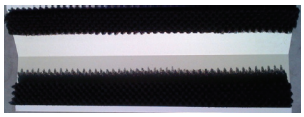
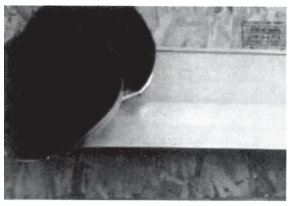
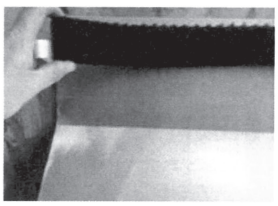
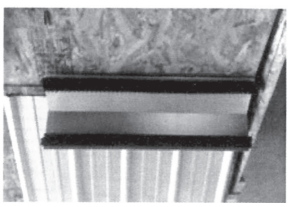
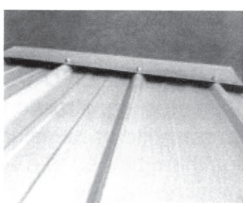
- Stock one product to match many roof panel configurations
- Designed for any pitch from 2/12 to 20/12
- Pure polyurethane foam with vinyl coating, UV stabilized and fire retardant
- Tested to withstand 110 MPH wind driven rain.
- 40 year limited warranty
- Does not scratch painted metal surfaces
- Dust free material with convenient packaging and easy installation
- Glue strip for easy installation. * Low profile installed appearance
- Florida Building Code Approved FL# 4640-R 1
- Exceeds Dade County requirement of TAS 100A











RAZORBACK RIDGEVENT FOR STANDING SEAM METAL ROOFING

Long life ridge vent rolls for standing seam metal roofing panels. Quick and easy installation with peel back adhesive. Standard convoluted Razorback Ridgevent will fit most 1″ and 1-1/2″ tall standing seam panels. For snaplock and mechanical lock panels of 1-3/4″ and 2″ height MASI offers a non convoluted version of Razorback Ridgevent in solid block form. Made in the U.S.A and code approved for use on metal panels.

Available Sizes
1 1/2" x 2" x 10'
1 3/4" x 2" x 10'
2" x 2" x 10'
2 1/4" x 2" x 10'

Special Installation Instructions Available for 1 1/2″ through 2″ tall panels.

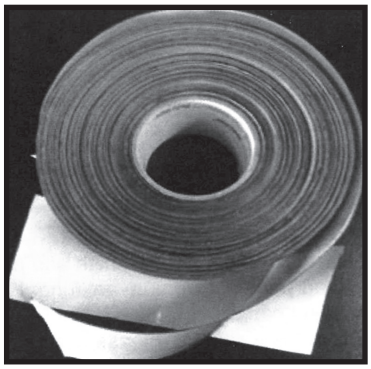
TAPE

ROOFING REPAIR TAPE

Designed to provide a watertight and airtight seal. Used to repair damaged or deteriorated roof areas and re-seaming all roof materials. Popular for repairs on metal roofing panels due to its excellent adhesion and no bleed out Tacky Tape adhesive that eliminates streaking coming from the product that you might experience from competing products. Also used for sealing interior and exterior air duct, gutters, awnings, pond liners, wrapping pipe connections to protect against corrosion in tough environments and as a flashing around windows and doors.



The Tacky tape™ adhesive has a long standing reputation as the best on the market for performance, longevity and resistance to fungal attacks. Tacky Tape® is a 100% solids, asbestos-free butyl tape sealant that is a highly rubbery, tacky, reinforced compound. It exhibits excellent application and performance characteristics over a wide temperature range and will not become brittle, crack or flow during service.

MADE IN THE USA

ADVANTAGES:

- Can be installed in damp areas even to clean surfaces underwater to stop or prevent leaks
- Excellent for Galvalume, Zincalume and KYNAR 500
- Adheres to oily Galvalume • Non-staining • Contains a fungicide to protect itself from mildew growth
- Tenacious adhesion to virtually all roof substrates, concrete, asphalt, PVC, E.P.D.M., TPO, metals, and urethane
- Will not corrode Galvalume, Galvalume Plus or KYNAR
- Meets ASTM and Federal standards, AAMA 711-07, AAMA 804(807).3-08, TT-C-1796A Type 11 Class B
- Permanently flexible and allows for joint movement of up to +/- 25%
- Resistant to ultraviolet and infrared radiations, precipitation atmospheric hydrocarbon contamination, extremes in temperature, water, alcohols, and most chemicals.
- Easy to apply by hand, requiring no premixing or dispensing, room temperature application, no heat is required to activate adhesive and provides instant seal.

Currently available in 4" x 25' rolls with white backing 16 rolls/case

Available by special order in 6" wide, 12" wide and other custom widths.

Also available by special order with black HDPE, gloss black TPO, polyester, and foil backing.

Special order minimums and lead times will apply.
